- EZ-MOD upgrades; plug and play modularity
- 1 maintenance-free blower for longer life and efficiency
- Super capacity HEPA filter removes 99.999% of particles at 0.3 microns
- Extended filter life with patent pending 360° pre filter and debris trap
- 2 separate gas filters provide long life and are easy to lift and ship
- Lower running costs thanks to separate gas and HEPA filters
- Dynamic Flow Control boosts power as filters block up
- Simple flow settings for quick start-up
- Airflow sensor for dynamic flow control - (standard)
- VOC sensor offers extra assurance of gas filter function (optional)
- Dust sensor offers extra assurance of HEPA filter function (optional)
- Lower equipment cost by design
- Stacked design makes filter replacement easy and reliable
- Interfacing to host machines for automatic start/stop
- Simple user interface
- North American quality design
- Customer support you can count on
- Fastest service and shipping
