

Oneida Vortex™ DCS
Dust Containment Systems

Bona Universal 8" or 10" Retrofit *VSR/SBU000*

- ▶ Improved collection at the floor.
- ▶ OAS stack replaces stock stack in order to allow clearance for cyclone to rotate from side to side.
- ▶ Machine stays cleaner, less maintenance.
- ▶ Reduced dust jam-ups at the drum. Sanding belts last longer.
- ▶ Eliminates cloth dust bag.
- ▶ Clean operation, no airborne dust.

Retrofit
Handle

Instructions:

- Remove stock stack by loosening the two bolts at the bottom of the stack.
- Replace with OAS stack using supplied 8 mil / 20 mil bolts. Use silicone on mating surfaces to insure a good seal.
- Sander cyclone is ready to be attached.

Appearance and color of Vortex subject to change.
