

Oneida Vortex™ DCS
Dust Containment Systems

Kunzle & Tasin Taurus Retrofit

VSRSKT000

- ▶ Improved collection at the floor.
- ▶ Retrofit incorporates existing Taurus handle and controls.
- ▶ Machine stays cleaner, less maintenance.
- ▶ Reduced dust jam-ups at the drum. Sanding belts last longer.
- ▶ Entire cyclone fits within width of machine.
- ▶ Clean operation. No airborne dust.
- ▶ Eliminates cloth dust bag.

Appearance and color of Vortex subject to change.

1. Lower drum and separate control arm from sander.
Fig. 1.

2. Loosen and remove Taurus handle from sander. Remove upper handle from steel tube by loosening Allen head screw.
Fig. 2 & 4.

3. Place OAS handle into Taurus making sure that the handle bottoms out on the sander. Tighten down Fig. 3.

4. Sander cyclone can now be attached to Taurus.
