

Oneida Vortex™ DCS
Dust Containment Systems

Hummel 8" Retrofit

VSRSLH000

- ▶ Improved collection at the floor.
- ▶ Retrofit handle replaces stock Hummel handle.
- ▶ Machine stays cleaner, less maintenance.
- ▶ Reduced dust jam-ups at the drum. Sanding belts last longer.
- ▶ Entire cyclone fits within width of machine.
- ▶ Clean operation. No airborne dust.
- ▶ Eliminates cloth dust bag.

Retrofit Handle

Appearance and color of Vortex subject to change.

Instructions:

- Remove Hummel handle from machine by loosening adjusting screw on control rod & wing nut holding handle on machine. Fig. 1 & 2.
- Loosen set screw that holds lift / lower controls in place. Un-screw black handle opposite control rod and slide controls out of stock Hummel handle. Fig. 3.
- Slide controls into OAS handle and tighten set screw. Fig. 4.
- Attach handle assembly to Hummel and tighten wing nut and adjusting screw, making sure handle is bottomed out on machine.
- Attach emergency stop bracket to OAS handle. Fig. 5.
- Sander cyclone can now be attached to Hummel.
